

Mancher Tag ist ein Scheißtag

Dr. Arne Babenhauserheide

<2021-01-06 Mi>

Es gibt diese Tage. Some days are just screwed-up. This is how I coped.

2021-01-06: Klima und Trump

Text on image:

- New study on global warming: 1.3°C bis 16°C committed.¹
 - 15°C means that large parts of the earth's surface become uninhabitable.²
- Armed Trump-supporters in Capitol, Senat evacuated.

Scheißtag.

All numbers were by memory. Actual numbers and References:

- ¹: the actual result is a [warming range of 1.15-16.2°C \(paper\)](#).
 - ²: actually already a [“warming of 11–12°C would expand these \[uninhabitable\] zones to encompass most of today’s human population“](#).
- [breached the capitol](#) — security was crappy: compare [security when BLM marches](#).

If you want a tangible reminder that some days are just screwed-up, you can [buy a Scheißtag-print from deviantart](#) :-).
